

### First a new and updated website...Newly launched the first week of January 2017

Old World Cobble® has always focused on keeping our dealers information up to date and to best help the dealers make the sales. Check out the new Old World Cobble® website when you need pallet weights, qty. information and other sales information, saving you the time and effort to e-mail or call on the phone. Go to [www.oldworldcobble.com](http://www.oldworldcobble.com) for more images of the material as it stands at OWC, in transit, and after installation. Check us out...

Old World Cobble® is so excited to announce our new [Sawback](#) line of materials. We understand the difficulties in installing cobblestone and our solution...saw the backside to install like a paver brick, but maintain the natural look and feel of granite. We are also developing our own line of veneer stone using the materials so natural to us. Flats as well as corner applications. We are heavily invested in developing and bringing you easier to install and thus labor/money saving material. Innovative garden wall blocks, and other materials are being developed as this is being composed.

**DID YOU KNOW...** Old World Cobble® has a fabrication area. Need custom sized treads??? Need material thermalled??? How about rock finish...Expedient, reasonably priced and efficiently produced onsite in Swansea, MA.

And soon it will all begin again...as it does every year...a new ship, loaded with Cobblestones. New Cobble colors will be in stock. New Paver material is on the way. New items are being developed for the OWC Sawback line. So Happy New Year to everyone...and we are indeed looking forward to a great 2017.
